Summary

Frontend Developer with 5+ years of experience building scalable web applications, fintech platforms, dashboards, SaaS products, and payment systems using React, Next.js, JavaScript, and TypeScript. Experienced in REST/GraphQL integrations, performance optimization, reusable component architecture, and secure user workflows.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks/Libraries: React, Next.js, Redux, Redux Toolkit, Redux Saga, Hooks, Tailwind CSS, Material UI, Ant Design, Bootstrap, Sass/SCSS, Webpack, Vite

Frontend Expertise: Component Architecture, State Management, Performance Optimization, Responsive Design, Cross-Browser Compatibility, Lazy Loading, Code Splitting

APIs/Tools: REST APIs, GraphQL, Axios, Apollo Client, Git, GitHub, Docker, Jenkins, Postman, Figma, Jira, CI/CD, Jest

Experience

Plutos One

August 2022 – Present

Software Engineer

Noida, India

- Developed scalable fintech applications and enterprise dashboards using React, Next.js, TypeScript, Redux Toolkit, REST APIs, and GraphQL, supporting high-volume transaction workflows.
- Developed the official Plutos ONE website with multi-page product showcases and 30+ enterprise campaigns for SBI, HDFC, BOB, and RuPay using Next.js App Router, GSAP, and Framer Motion.
- Built enterprise dashboards processing 100K+ daily transactions across 8+ banking partners, enabling reconciliation, settlement, reporting, transaction monitoring, and workflow automation.
- Designed a scalable multi-service transaction platform supporting 30+ service integrations and 100+ REST/GraphQL APIs with centralized API management and multi-tenant routing.
- Developed a B2B Buyer/Supplier platform using Next.js, TypeScript, Tailwind CSS, and Redux Toolkit with RBAC, JWT authentication, SSO, protected routes, invoice workflows, and real-time notifications.
- Implemented multi-bank reconciliation workflows supporting XML/ZIP file processing, NTSL calculations, SAL file generation, asynchronous report downloads, and status polling.
- Implemented secure authentication and authorization using SSO, JWT, RBAC, two-factor authentication, and protected routing; improved frontend performance through lazy loading and code splitting, reducing initial load time by 30%.
- Developed rewards and engagement modules that increased repeat user activity by 25%. “

Triline Infotech

July 2021 – August 2022

Software Engineer

Noida, India

- Engineered responsive React and Next.js interfaces for the Caratlane e-commerce platform displaying 500+ products and improving product browsing experience across devices.
- Integrated REST APIs for dynamic product catalogs, pricing modules, and order management systems.
- Collaborated with UI designers and backend teams to deliver scalable web applications in agile environments.
- Built reusable UI components improving maintainability and cross-device responsiveness.

Projects

Real-Time Trading Dashboard | Next.js, React, Redux Toolkit, WebSockets, Chart.js, Tailwind CSS

Feb 2026 - Present

- Built a real-time dashboard displaying live cryptocurrency market data using WebSocket APIs.
- Created interactive charts and analytics for price trends, order books, and trading volumes.
- Optimized rendering performance using memoization, lazy loading, and reusable components.
- Delivered responsive UI for desktop and mobile trading experiences.

Micro-Frontend SaaS Dashboard | React, Module Federation, Webpack, TypeScript

Nov 2025 - May 2026

- Built scalable micro-frontend architecture using Webpack Module Federation enabling independent deployment of modules.
- Created multiple React micro-applications including authentication, analytics dashboard, and notification services.
- Improved scalability, deployment speed, and maintainability for enterprise SaaS systems.

Education

Allahabad University

2019 – 2021

M.Sc. Mathematics

Allahabad

Dr. A.P.J. Abdul Kalam Technical University

2016 – 2019

B.Tech, Electronics Engineering

Lucknow

Chhatrapati Shahu Ji Maharaj University

2013 – 2016

B.Sc. Mathematics

Kanpur
